SUMMARY

Senior Android Developer with 5 years of experience building and scaling production apps in live auctions, e-commerce, fintech, healthcare, and on-demand delivery. Specialized in Kotlin and Jetpack Compose with Clean Architecture, MVVM/MVI, and multi-module codebases. Delivered real-time bidding, live streaming, in-app chat, payment gateway integrations, multilingual RTL interfaces, and biometric identity verification SDKs, with a strong focus on performance, stability, and clean, testable code.

EXPERIENCE

Senior Android Developer | Mazaady

Feb 2026 – Present

Saudi Arabia (Remote)

Key products: Mazaady (live auctions marketplace) | Rivals (bidding & tenders) | Doworkss (freelancing marketplace)

- Develop and maintain Android apps across the company's products using Kotlin, Jetpack Compose, and MVVM with Clean Architecture.
- Built real-time bidding and auction flows with Pusher and GraphQL, along with WebRTC live streaming for auctions and Pusher-based in-app chat.
- Integrated Tap payments with country-based currency detection for secure checkout and auction settlement.
- Built multilingual RTL interfaces supporting 6 languages, including Arabic and Urdu.
- Refactored and migrated legacy code, moving screens from XML to Jetpack Compose and restructuring modules to improve maintainability.
- Monitored app stability with Firebase Crashlytics and Sentry, and worked on CI/CD pipelines with Bitrise and Fastlane.
- Contribute to code reviews and Agile sprints, focusing on performance, stability, and a smooth buying and selling experience.

Android Developer | Valify Solutions

Jul 2025 – Jan 2026

El-Maadi, Cairo, Egypt

Key products: eKYC / eKYB identity verification SDK for banks and fintech apps

- Built and maintained Valify's Android eKYC/eKYB SDK, integrated by fintech and mobility apps such as Klivvr and inDrive for secure customer onboarding.
- Developed a configurable builder API that lets client apps customize the SDK's verification flows and UI to their needs.
- Integrated biometric authentication and digital identity verification modules within the SDK.
- Optimized SDK performance by reducing latency and strengthening security checks.
- Participated in regular code reviews, promoting best practices and improving overall code quality.

Android Developer | Dru

Jul 2024 – Jul 2025

El-Sheikh Zayed, Giza, Egypt

Key products: Dru (digital healthcare app)

- Developed and maintained Dru's Android app, where patients upload lab tests and X-rays and share them with doctors.
- Worked on features including healthy meal plans, weight-loss programs, and reminders for medications and daily activities.
- Integrated health tracking APIs and third-party services for real-time health monitoring.
- Built features using Kotlin, XML, and Jetpack Compose, and contributed to Agile sprint planning.

Android Developer | Shgardi

Oct 2021 – Jul 2024

El-Maadi, Cairo, Egypt

Key products: Shgardi (food, grocery & package delivery)

- Worked in the Financial squad within a squad-based team, delivering payment-related features of the app.
- Maintained and enhanced the Shgardi Android app across food, grocery, and package delivery services.
- Implemented analytics and improved user flows based on data-driven insights.
- Performed code reviews and collaborated on Agile sprints to meet delivery targets.

PERSONAL PROJECTS

Square Repos | Kotlin, Compose, Paging 3, Room, Hilt, Multi-module
github.com/bassanthassanibrahim/square-repos-android

- Offline-first app with Paging 3 RemoteMediator, shared-element transitions, bookmarks, 37 unit/UI tests and GitHub Actions CI.

SpaceX Launches | Kotlin, Compose, MVI, Apollo GraphQL, Hilt github.com/bassanthassanibrahim/LaunchesApp

- Multi-module Clean Architecture app with cursor-based pagination, network-aware auto refresh, Arabic/English RTL, dark mode, and unit tests with MockK.

Reddit Kotlin News | Kotlin, Compose, Hilt, DataStore github.com/bassanthassanibrahim/NewsKotlinReddit

- Feature-module architecture with offline support through DataStore caching, StateFlow-driven UI, and Compose UI tests.

TMDb Movies | Kotlin, Compose, MVVM, Paging 3, Room, Retrofit github.com/bassanthassanibrahim/Movies-App

- Movie browsing app with Paging 3, offline-first caching in Room, error handling, and unit tests for the domain layer and ViewModels.

SKILLS

Languages: Kotlin, Java, XML

UI: Jetpack Compose, XML Layouts, Material Design, Navigation, Data Binding, i18n & RTL

Architecture: Clean Architecture, MVVM, MVI, Multi-Module, SOLID

Async & State: Coroutines, Flow, StateFlow, LiveData, WorkManager

Networking & Real-Time: Retrofit, OkHttp, REST APIs, GraphQL (Apollo), WebSockets, Pusher, WebRTC

Data & Storage: Room, DataStore, SharedPreferences, Paging 3

Dependency Injection: Dagger-Hilt, Koin

Testing: JUnit, MockK, Espresso, Compose UI Testing

Integrations: Firebase (Crashlytics, FCM, Analytics, Remote Config), Tap Payments, Payment Gateways, In-App Billing, Google Maps SDK

Performance & Monitoring: Profiling, Baseline Profiles, Compose Recomposition Optimization, Crashlytics, Sentry

Tools & Practices: Bitrise CI/CD, GitHub Actions, Fastlane, Play Console, Git, Gradle, Agile / Scrum, Code Review

AI-Assisted Development: Claude Code

EDUCATION

Bachelor of Computer Science | Faculty of Computers and Information, Mansoura University Aug 2016 – Jul 2020

Android Development Training | Information Technology Institute (ITI) 3 months
